

Vaulting box 120

The Vaulting box is used for vaults as well as for other physical and relaxation activities. This element is made of a foam material with higher stiffness. The higher stiffness of the material prevents denting. Therefore, the adult can exercise on it too. The cover is made of phthalate-free Belgian synthetic leather. There is Velcro on the sides of each piece for joining modules together. At the bottom of each piece is antislip, which allows to use the individual parts and put them on the floors (no slip). Individual parts can be purchased.
